

Versa Pad Features and Benefits

Features	Benefits
Easy transferring of patient	Versa Pad is the only product designed to be used with or without any transferring devices (i.e. HoverMatts) or draw sheets.
Three bi-lateral positioning straps	Positioning straps assist with proper O.R. patient positioning.
Foam Pad with non-slip material	Cushions the patient's body and inhibits unintended movements.
Three bi-lateral positioning anchors	Six fixation straps anchor pad to table virtually eliminating patient migration during the procedure.
Bi-lateral upper extremity protectors Split window design Reduce add-on items	Aid in patient comfort and protection. Allows for easy patient I.V. access. Built-in upper extremity protectors eliminate need for additional ulnar nerve protectors.
Secondary body secure strap	Provides secondary body support during various procedures.
Single Use Item	Quick and easy post-surgery clean up.
Incorporate OR protocols	Allows for use of OR turnover gurney sheets to facilitate room clean up.
JCAHO compliant	Elimination of unsanitary residues from duct or surgical tape.
<i>Can be used with Versa Sled</i>	<i>Allowing for greater restraint and protection of patient upper extremities.</i>
